Title

WeCare: Android App to donate food and clothes to charities

Short Description

An app that benefits society by donating food and clothes to charity homes. This app helps match restaurants and individuals with leftover food and clothes with charities in need. Donations are collected from user's location on their convenient hours. Volunteers can use the app to deliver the food or clothes to charities according to their schedule.

Long Description

It would be very convenient and helpful if donations can be made on few clicks of their android phones and items will be collected at their doorsteps at their convenient hours. 12% of Americans are food insecure and don't know where their next meal is coming from. Through the "WeCare" app donating food or clothes to charities has never been easier.

This app provides many functionalities. A list of all the parties and their respective locations associated with the app is provided. The participating donors and charity homes are categorized under a spinner. When the respective item is clicked, for e.g. restaurants, all the participating restaurants along with a location pin will be displayed.

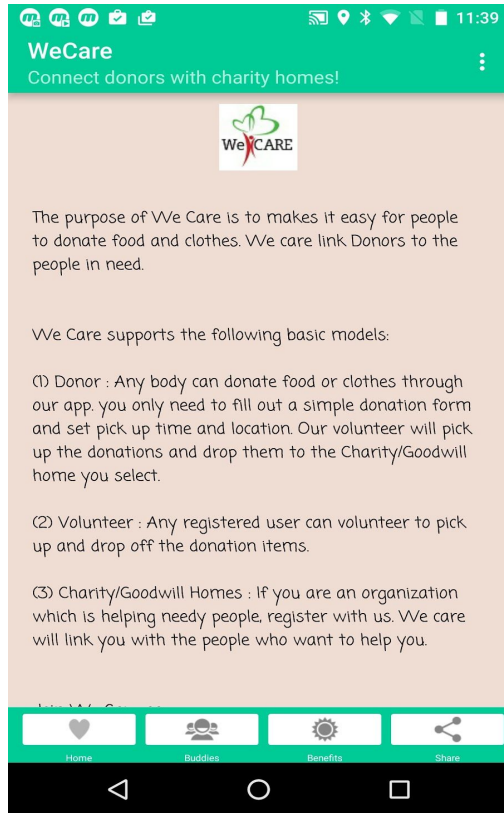

For donors, you download the app, you can select the food and clothes you want to donate, the charity you want to donate to, your address and a convenient time you want the volunteer to come by. You push the "Save" button, then the selected charity home is notified of your donation. A "goodwill" points system for individuals and restaurants can be managed so that restaurants can be benefited by this app which are willing to donate extra food.

Charity homes benefit from this app as it helps them to systematically keep track of donors and total items collected in particular time duration. The Charity home which has been selected has access to a volunteer schedule and it can select the volunteer depending on his availability and notifies a volunteer of the pickup scheduled. It's that easy.

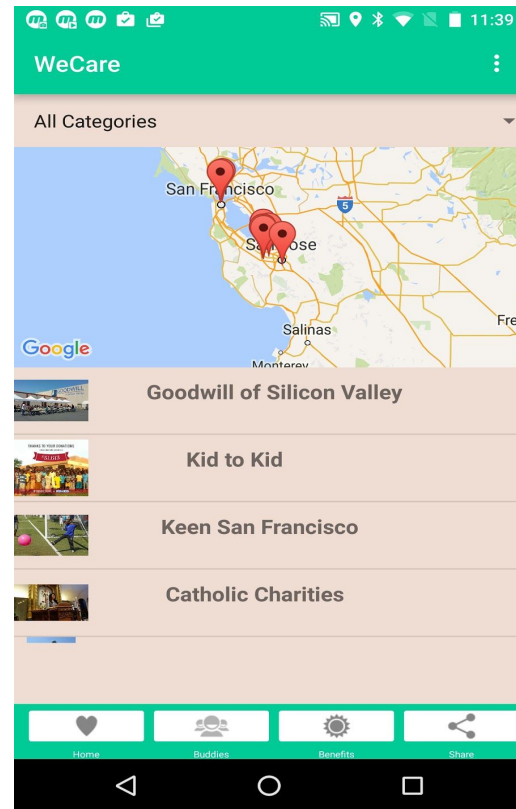

Please join and help make a difference.

Social Login Screen

A mobile app mockup of a Facebook login screen. The screen is framed by a black border representing the phone's bezel. At the top, a status bar shows various icons and the time 12:18. Below the status bar is a blue header with the 'facebook' logo. The main content area has a light blue background. It features a circular icon with a stylized atom symbol. Below the icon, the text 'Log into your Facebook account to connect to We Care' is displayed. There are two input fields: the first contains the email 'vidu1988@gmail.com' and the second contains masked characters '.....'. A blue 'SHOW' link is positioned to the right of the password field. Below the inputs is a large blue 'Log In' button. Underneath the button, there are links for 'Forgot Password?', 'Help Center', and 'Create Account'. At the bottom, there is a list of languages: English (US), Français (France), Português (Brasil), Italiano, Español, 中文(简体), Deutsch, and More Languages... The footer of the screen displays 'Facebook ©2016'. The bottom of the mockup shows the standard Android navigation bar with back, home, and recent apps icons.
